

For Immediate Release

FER-PAL Construction Ltd Named 2017 Excavator of the Year

(03/04/2018) Toronto, ON - FER-PAL Construction Ltd is pleased to announce that it has been named the 2017 Excavator of the Year (Water and Sewer) by the Ontario Regional Common Ground Alliance (ORCGA).

Starting in 2004, the ORCGA has presented the Excavator of the Year Award to the contractor who has the lowest amount of utility strikes per excavation throughout the calendar year within the province of Ontario. There are eight categories in which a contractor can win including electric, gas, water & sewer and roads.

First honoured in 2006, this is the fourth time FER-PAL was given the award for the water & sewer category. The company was previously honored in 2009 and 2011.

"As a COR™ certified company we always strive to keep our employees and the public safe," said Shaun McKaigue, President and CEO of FER-PAL Construction Ltd. "This award demonstrates our companies safe work practices and dedication to adhering to the provincial rules and regulations."

In 2017 FER-PAL reported requesting over 8500 locates to the provincial *ON1CALL* system. Within those locates the company experienced a utility strike occurrence rate of under 1%.
